DISPOSABLE 60° TURN RECIPROCATING LATEX FREE PROPHY ANGLES

NO SPLATTER - The centrifugal force generated by a normal 360° turn prophylaxis angle results in splattering and mess. Our NEW 60° turn reciprocating prophylaxis angles eliminates potential splattering of prophylaxis paste, blood and saliva, keeping the prophylaxis paste in the cup where it belongs.

NO HEAT - Our NEW 60° turn reciprocating prophylaxis angles build up much less heat during use, assuring a smooth, cool treatment for your patient.

EFFECTIVE - Due to less heat generated during use, if necessary more pressure may be applied to remove stubborn stains.

FASTER - Thanks to our innovatively designed NEW 60° turn reciprocating prophylaxis angles, the prophylaxis cup or brush can be used continuously on the tooth surface, saving valuable chair time.

SAFER - The rotational motion of traditional prophylaxis cups and brushes can cause laceration and bleeding of the gums. Our NEW 60° turn reciprocating prophylaxis angles provide a much safer and pain-free prophylaxis treatment.

Disposable 60° Turn Reciprocating Prophylaxis Angles LATEX FREE 100/pk
